

The Effects of Clean Water

Over **1 billion people** worldwide don't have access to clean water. In addition, contaminated water kills over **3.4 million people every year.**

BUT HERE'S THE GOOD NEWS.

Since 2012, innovative efforts at WHOlives have resulted in over 2,400 clean water wells, bringing crystal clear drinking water to more than TWO million people in over 33 countries.

Here are the effects of CLEAN WATER...

- **SAVES LIVES:** Helps eliminate Malaria, Cholera, Dysentery and other gastrointestinal diseases caused by contaminated water.
- **INCREASES EDUCATION:** Most girls drop out of school because no water means no sanitary location during menstrual cycle. Also, with a well at a school, girls can go to school instead of fetching water all day.
- **INCREASE INCOME:** Fewer doctor visits, fewer missed work days. More productive and healthy animals lead to more prosperity and less poverty.
- **INCREASE AG YIELDS:** Produces healthier, more sustainable crops as a 10% increase in irrigation can add 50% to their overall yield. Enables an additional growing season during dry months, often doubling profits.
- **BETTER SANITATION:** The lack of toilets is in direct proportion to the lack of water. Introduce water and better sanitation will follow.
- **CREATES SUSTAINABLE JOBS:** By adding the village drill to a water project, local entrepreneurs can create a viable drilling business for their village or community.

Add a clean water project to your humanitarian efforts. Call **888-675-4837** or email help@WHOlives.org.

The Village Drill

The Village Drill can access clean water in 75% more places for 75% less cost.

PROVIDING CLEAN WATER AND ECONOMIC INDEPENDENCE FOR INDIVIDUALS AND COMMUNITIES

The Village Drill is the solution for 1 billion people worldwide who don't have access to clean water. In three years over 2,400 Village Drill wells have been drilled in 33 countries, providing clean water to over 2 million people. Hundreds of jobs have also been created. How does it work?

- It's **STRONG** enough to penetrate nearly all substrates with human power.
- **EASILY TRANSPORTABLE**. Unlike a large drilling rig that can only reach 25% of the population, The Village Drill is capable of reaching virtually all people in need, both in cities and rural villages.
- It's **OWNED, MANAGED** and **MAINTAINED** by local entrepreneurs, which creates jobs and opportunity for a profitable drilling business anywhere!

Now you can transform your humanitarian project from good to great by adding The Village Drill. It's a sustainable cash solution that changes lives! To learn how, call us at **888-675-4837** or email help@WHOlives.org
